SPHERE
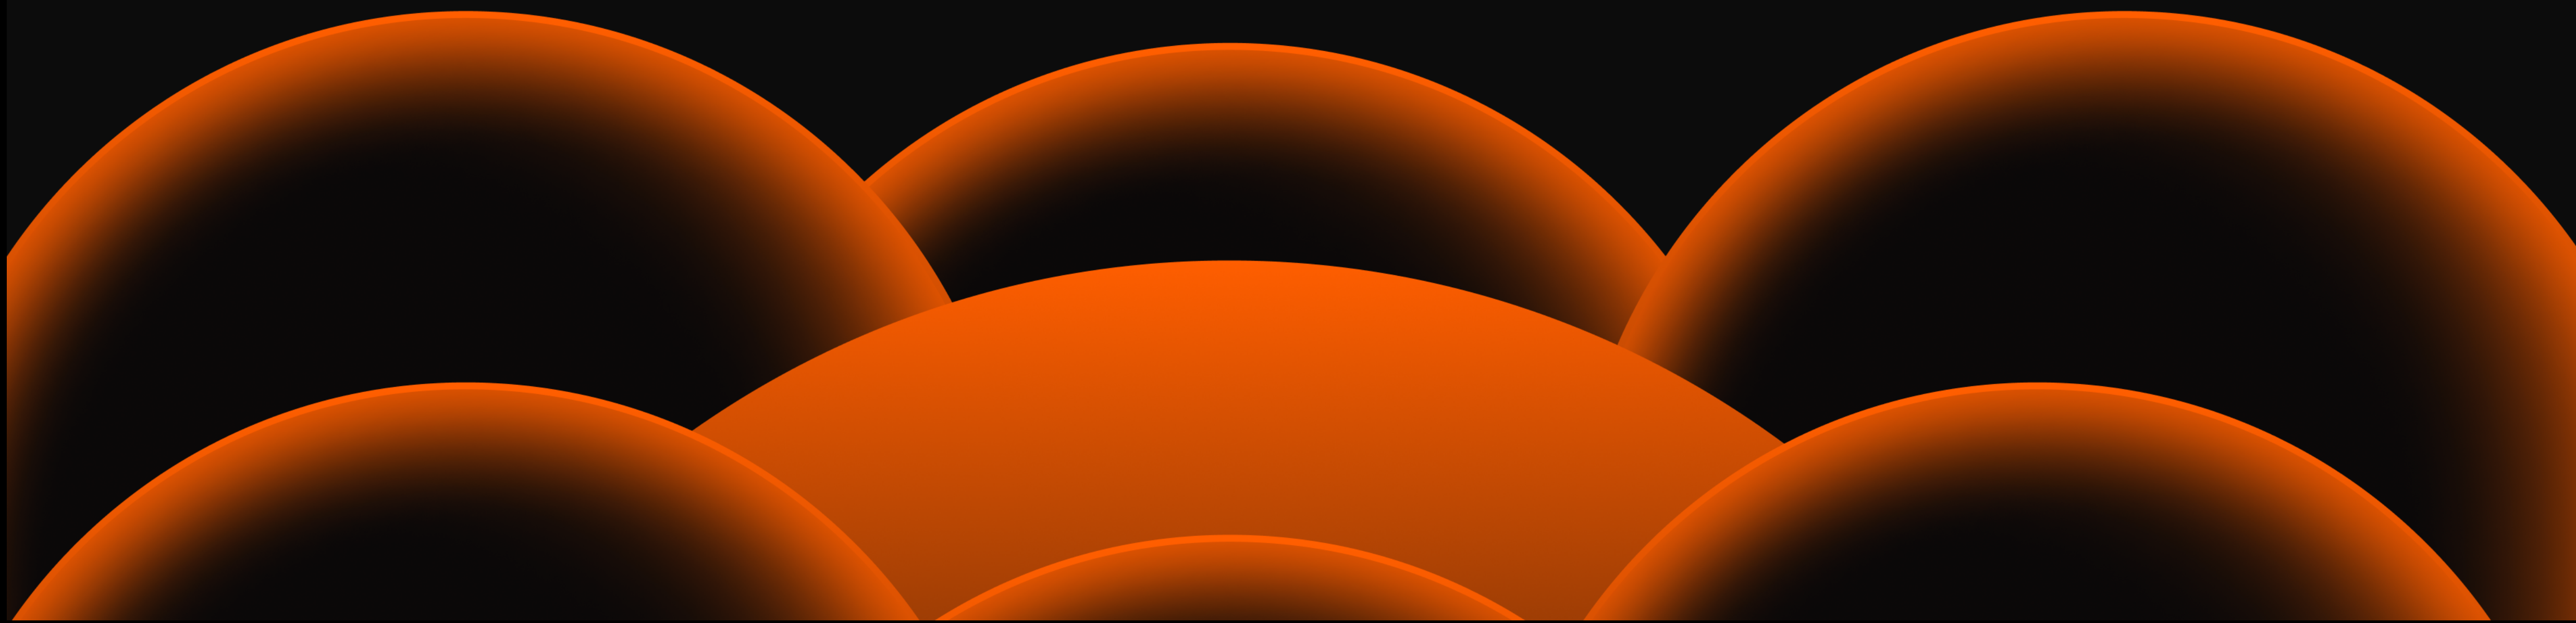

Your College Your AI

There is no way for college to make their own AI with their own data

Bad Time & resources management

Canvas and ChatGPT had a baby

As you Know CANAVS is a LMS used by the collage to manage the educational resources .Now this LMS acts the Brain for LLM's creating a collage specific AI

Sphere   It is a productivity bases Learning Management System (LMS)

SphereLM   It a open source samll, fast Language Model (LLM)

Why us ? Over GPT/Gemini

→ It's open source and you can host it on your serves . Lets say if X company goes down tomorrow . all your study infra is down .Tomorrow if we go down As its hosted locally you can still run the model because its going to be open source and their is a large community to support it

→ X model provider does not allow you to use your custom Knowledge base .

→ Privacy and Transparency

10B

Total addressable market

400 rs

Per head/Year

50,000+

Educational institution

500+

Average no of students per institutions

If we can capture 1% of the market we can have 100M in revenue
